

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	5 September 2026
Team ID	Individual
Name	Namburi Sriya Ram
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Employee Issue Submission	Provide an Employee Center/Service Portal option for employees to raise workplace or technical issues. Employee enters the required issue details and submits the request.
FR-2	Issue Data Collection & Validation	Capture requester, category, subcategory, short description and other required information. Use UI Policies to enforce mandatory fields and control field behavior.
FR-3	Dynamic Categorization	Allow employees to select an issue category and display the relevant subcategory based on the selected category. Ensure appropriate choices are available during submission.
FR-4	Issue Record Creation	Automatically create an employee issue record from the submitted information. Store issue details such as requester, category, subcategory, description, state, priority and assignment group..
FR-5	Issue Assignment & Management	Allow support/admin users to assign issues to the appropriate support group, update priority and manage the issue throughout its lifecycle.
FR-6	Issue Tracking & Status Management	Allow employees and authorized users to track the issue status. Support status updates such as New, In Progress, Resolved and Closed.
FR-7	Portal & Widget Access	Provide custom Employee Center widgets and portal components for quick access to issue submission, issue information and relevant self-service options.
FR-8	Issue Resolution & Closure	Allow the support team to update resolution details and close the issue after the problem has been resolved.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Employee Center and issue submission form should be simple, clear and easy for employees to use.
NFR-2	Security	Only authorized users should be able to access, create or manage employee issue records according to their roles and permissions.
NFR-3	Reliability	The system should consistently create and maintain issue records without losing submitted information.
NFR-4	Performance	Request submission, workflow execution, approval routing, and task creation should complete within an acceptable response time.
NFR-5	Availability	The Employee Center and issue management functionality should be available to employees and support users through the configured ServiceNow instance.
NFR-6	Scalability	The solution should support increasing numbers of employees, issue records, categories, subcategories and support groups without major redesign.
