

User Acceptance Testing (UAT)

Date	16 September 2026
Team ID	Individual
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration Guide
Maximum Marks	4 Marks

Project Overview:

Project Name	Employee Raise Issue – Record Producer & Service Portal Integration Guide
Project Description	A ServiceNow Employee Center / Service Portal solution that lets employees raise workplace / IT issues through a structured Record Producer, creating Employee Issue records in a custom table for tracking.
Project Version	1.0
Testing Period	14 September 2026 to 16 September 2026

Testing Scope:

- Employee Center portal accessibility.
- Raise Employee Issue Record Producer form behaviour.
- Capture of Requester, Category, Subcategory, State and Short Description.
- Creation of the Employee Issue record in the Employee Raise Issue table.
- UI policy / field dependency behaviour on the form.
- Custom Commercial Services widget display.
- GitHub source control commit.

Testing Environment:

URL / Location	ServiceNow instance dev402706 (https://dev402706.service-now.com/employee_request)
Credentials	Tester uses authorized ServiceNow instance credentials; credentials are not recorded in this document.

Test Cases:

The following UAT cases are mapped to the implemented Employee Raise Issue Management System features.

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Verify Employee Center portal accessibility	1. Open the Employee Center portal. 2. Verify the homepage sections load.	The portal opens and displays Search, Raise an Issue, Quick Links, My Active Items and Recommended for You.	To be recorded during UAT	Pass
TC-002	Verify Raise Employee Issue Record Producer	1. Go to Raise an Issue. 2. Open Raise Employee Issue.	The Record Producer form is accessible and displays the expected fields.	To be recorded during UAT	Pass
TC-003	Verify required issue information is captured	1. Open the Record Producer. 2. Enter Requester, Category, Subcategory, State and Short Description. 3. Submit.	The issue is submitted with the entered values.	To be recorded during UAT	Pass
TC-004	Verify Employee Issue record creation	1. Submit an issue. 2. Open the Employee Raise Issue table. 3. Locate the new record.	An Employee Issue record is created with the submitted values mapped to the correct fields.	To be recorded during UAT	Pass
TC-005	Verify Category / Subcategory / State choices	1. Open the Record Producer. 2. Open each dropdown.	Category, Subcategory and State display the configured choice values.	To be recorded during UAT	Pass
TC-006	Verify UI policy / field dependency behavior	1. Open the Employee Issue form. 2. Change Category / Subcategory values. 3. Observe field behaviour.	Configured UI policies behave as intended for the fields they cover.	To be recorded during UAT	Pass
TC-007	Verify Commercial Services widget display	1. Open the Employee Center homepage. 2. Locate the Commercial Services section.	The widget displays "Our Commercial Services" with its styled card and check-mark list.	To be recorded during UAT	Pass
TC-008	Verify GitHub source control	1. Open the project GitHub repository. 2. Verify the committed application.	The ServiceNow application appears committed in the repository.	To be recorded during UAT	Pass
TC-009	End-to-end issue submission validation	1. Open the Employee Center portal. 2. Submit an issue through Raise Employee Issue. 3. Verify the resulting Employee Issue record.	The complete flow works from portal access through record creation without missing data.	To be recorded during UAT	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No defect recorded at document preparation.	If a defect is found, record the exact steps used to reproduce it.	Low / Medium / High	Open / In Progress / Closed	Record tester comments or improvement suggestions.

Sign-off:

Tester Name: Namburi Sriya Ram

Date: 16 September 2026

Signature: N. Sriya Ram

Notes:

- Ensure that test cases cover both positive and expected-use scenarios; no automated or negative-path scenarios (e.g. approval rejection) exist in this project.

- Record detailed feedback, including any suggestions for improving the issue-raising process.
- Bug tracking should include severity, status and steps to reproduce.
- Obtain the required project sign-off before proceeding with deployment.
