Employee Raise Issue – Functional & Performance Testing:

The project team validated the ServiceNow Employee Raise Issue submission process from Employee Center portal access through the Raise Employee Issue Record Producer, choice fields, submission, record creation and the custom Commercial Services widget.

S.No.	Parameter	Values / Test Description	Expected Result	Actual Result	Pass/Fail
1	Employee Center Portal Accessibility	Open the Employee Center portal at the project URL (https://dev402706.service-now.com/employee_request).	Portal opens successfully and the homepage (Search, Raise an Issue, Quick Links, My Active Items, Recommended for You) is displayed.	Pass – portal opened and homepage displayed.	Pass
2	Raise Employee Issue Availability	From the Employee Center homepage, navigate to Raise an Issue.	The Raise Employee Issue Record Producer is listed and accessible.	Pass – Raise Employee Issue available under Raise an Issue.	Pass
3	Record Producer Form	Open the Raise Employee Issue form and verify the fields shown.	The form loads with Requester, Category, Subcategory, State and Short Description variables.	Pass – form loaded with all configured variables.	Pass
4	Category Choices	Open the Category dropdown on the form.	Network, Software, Hardware and Access are listed.	Pass – all four choices displayed.	Pass
5	Subcategory Choices	Open the Subcategory dropdown on the form.	VPN, Laptop, Server and Forgot Password are listed.	Pass – all four choices displayed.	Pass
6	State Choices	Open the State dropdown on the form.	New, In Progress, Resolved and Closed are listed.	Pass – all four choices displayed.	Pass
7	Short Description	Enter text in the Short Description field.	The text entered is accepted by the field.	Pass – short description accepted.	Pass
8	Submission	Fill in Requester, Category, Subcategory, State and Short Description, then submit.	The issue is submitted successfully from the form.	Pass – issue submitted with the configured variables.	Pass
9	Employee Issue Record Creation	Open the Employee Raise Issue table after submission and verify the new record.	An Employee Issue record is created with the submitted values mapped to the correct fields.	Pass – record created (ticket EMP0001004).	Pass
10	Commercial Services Widget Display	View the Employee Center homepage.	The custom Commercial Services widget displays “Our Commercial Services” with its styled card and check-mark list.	Pass – widget displayed as designed.	Pass

Summary: 10 of 10 test cases passed, based on the testing performed on the ServiceNow instance dev402706.

Not separately tested (and therefore not claimed as validated): attachment upload on the Record Producer, detailed UI policy / field-dependency behaviour, access security and permissions, and load / stress / response-time performance. The project does not include Business Rules, Update Sets or automated workflow to validate, since these were not implemented.
